

Notice from Nagasaki City:

Construction Work for the Maintenance and Preservation of the World Heritage Site “The Glover House and Office” (Nationally Designated Important Cultural Property)

Construction period: January 2020 – November 2020 (estimated period)

Details: In order to properly maintain the Glover House and Office, a Nationally Designated Important Cultural Property and site inscribed on the World Heritage List as a component of the “Sites of Japan’s Meiji Industrial Revolution: Iron and Steel, Shipbuilding and Coal Mining,” and in order to insure the safety of visitors to the site, we will be performing construction work for the site’s maintenance and preservation, including seismic refitting.

While you will not be able to enter and tour the building during the construction, we will be creating a temporary observation deck for visitors to be able to check on the maintenance work.

Maintenance and preservation work affecting the entire building has not been performed since 1968, making this the first time in half a century. This is an invaluable chance to see the construction first hand, and we hope that you will take this chance to visit Glover Garden.
